Directions on how to Navigate GeoVision POC:

1. Start the app
2. If you do not have an account, click sign up and input requested information; click create account when finished and it will take you back to the sign in screen.
3. If you already have an account, type in username and password
4. Click sign in. That will bring you to the home page for GeoVision.
5. To start analyzing a picture, click Choose a Picture. This will bring up your files to where you can select an image that is on your computer.
6. Once an image is selected, click open and your photo will display on the app.
7. Next click Analyze for the AI to produce a description and tags for the image you selected.
8. You can repeat the same process if you want to select a different image. To exit the app, click close app.
